Overview

Highly proficient Software Developer with **4+ years** of experience specializing in high-performance, scalable microservices and distributed systems, primarily using **Golang**. Expert in cloud-native architectures (**GCP, AWS**), including provisioning, serverless functions, and GenAI orchestration. Proven ability to lead complex projects and optimize critical systems (e.g. zero-downtime migration, low-latency proxies). Seeking a challenging backend or full-stack role to leverage deep Go and cloud technical expertise.

Technologies & Skills

- **Programming Languages & Frameworks:** Golang (Advanced), JavaScript/TypeScript, Python, Java, C++, Node.js, Express, React, Next.js, Vue.js, Quasar, Redux, Gin-gonic, Tailwind
- **Databases:** MySQL, PostgreSQL, MongoDB, YugabyteDB, Bigtable, Cassandra, Redis, NoSQL
- **Cloud & DevOps:** GCP, Azure, AWS Bedrock, Docker, Kubernetes, Cloud Functions, Serverless, CI/CD, Git
- **Testing & Tools:** Jest, Sinon, Playwright, Unit Testing
- **Architecture & Concepts:** Microservices, Distributed Systems, gRPC, Protobuf, Kafka, Vertex AI, OOP,, Full-Stack
- **Languages:** English, Hindi

Experience

Software Developer	Ollion(formerly CloudCover)	Remote(Pune), India	03/2022 - Current
• Cloud Infrastructure Platform: Architected and developed a multi-cloud provisioning portal using Golang and Node.js to automate secure account setup across GCP, AWS, and Azure. Built robust services for RBAC (Azure AD), billing/budgeting APIs, and infrastructure provisioning, streamlining cloud operations for enterprise clients. • Low-Level Middleware (Golang): Engineered a Cassandra-to-Bigtable Proxy in Go, handling binary protocol encoding/decoding via DataStax libraries. Managed high-performance Protobuf data transmission and gRPC calls in collaboration with Google's Bigtable team to ensure seamless query translation. • Zero-Downtime Migration (ZDM): Spearheaded the POC for a zero-downtime migration strategy; benchmarked the Go proxy to achieve a negligible 5ms latency overhead, enabling Cassandra-based apps to migrate to Bigtable with zero code changes. • GenAI Orchestration: Developed an internal RAG-based AI Chatbot using Vertex AI and Golang; implemented a secure, air-gapped AWS Bedrock solution for financial sector clients using Titan and Stability AI models. • High-Performance Go Libraries: Authored internal SDKs using interfaces for abstraction, Goroutines, and chunking to optimize upload speeds and standardize cross-cloud interactions (S3, GCS, Pub/Sub) across company projects. • Backend Media Services (Zee5): Part of the team for the backend migration of video streaming services from AWS to GCP. Integrated Ateme Titan for transcoding and Nagra DRM for content security, utilizing Kafka for resilient inter-service communication. Created multiple workflows like adding admarkers, cache purging,			

Jr FullStack Developer	Skynox tech	Remote(chandigarh), India	08/2021 - 02/2022
• Fintech Integration & Payout Logic: Developed and integrated complex multi-gateway payment solutions (Stripe, PayPal, Coinbase Commerce), implementing automated seller payout and balance management logic. • E-commerce & Full-Stack Development: Engineered a full-stack e-commerce marketplace for Notion templates using Next.js and MongoDB, managing the entire lifecycle from wireframe to API deployment.			

Education

Bachelor of Technology(Computer Science)	Rajasthan Technical University	Jaipur, Rajasthan, India	2016 - 2020
Class XII	Gurunanak Higher secondary School(CBSE)	Ranchi, Jharkhand, India	2015 - 2016

Certifications

- GCP DIGITAL Leader(2023), GCP Associate cloud engineer(2023), GCP Professional cloud Developer(2026), GCP Generative AI Leader(2026)
